Art Unit: 2157

1. This action is responsive to the application filed on January 16, 2001. Claims 1-40 are pending.

Election/Restriction

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-16, 28-40, drawn to demand based messaging, classified in class 709, subclass 206.
- II. Claim 17-27, drawn to computer network monitoring, classified in class 709, subclass 296.

3. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because invention II is directed toward network computer monitoring. The subcombination has separate utility such as flow data control transmission in a network and controlling data admission to the network.

A telephone call was made to Mr. James Miner (Registration No. 40,444) on June 25, 2004, to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

Applicant is reminded that upon the cancellation of claims to a non-elected

4. A shortened statutory period for response to this action is set to expire **0 (zero) months and 30 (thirty) days** from the mail date of this letter.
